

## Introduction

The Observer Application continuously listen for the advertisement data over the air.

The application supports 12 advertisement data types. They are listed as follows:

- Incomplete List of 16-bit Service Class UUID
- Complete List of 16-bit Service Class UUIDs
- Incomplete List of 32-bit Service Class UUIDs
- Complete List of 32-bit Service Class UUIDs
- Incomplete List of 128-bit Service Class UUIDs
- Complete List of 128-bit Service Class UUIDs
- Shortened Local Name
- Complete Local Name
- Appearance
- Manufacturer Specific Data
- TX Power
- Advertisement Interval.

# 1 Purpose

This guide describes the setup of an Atmel® ATSAMB11 Xplained board and bringing-up an example profile supplied as part of BluSDK SMART release. The Bluetooth® Observer application is an example application that is embedded as part of the software release package.

## 2 Demo Setup

## 3 Hardware Setup

Connect the ATSAM B11 board to the host PC using a Micro-USB cable.

Figure 3-1. EDBG USB Port

## 4 Software Setup

### 4.1 Installation Steps

1. Install the latest Atmel Studio [Atmel Studio 7.0 (build 629 or later) web installer (recommended)]  
<http://www.atmel.com/tools/ATMELSTUDIO.aspx>.

2. Install the latest Atmel Software Framework.

This package will install the following examples within the Atmel Studio environment.

- Observer Application for ATSAMB11

### 4.2 Build Procedure

The following procedure is explained for ATSAMB11 application example.

1. Select New Example Project.

Figure 4-1. Creating a New Example Project

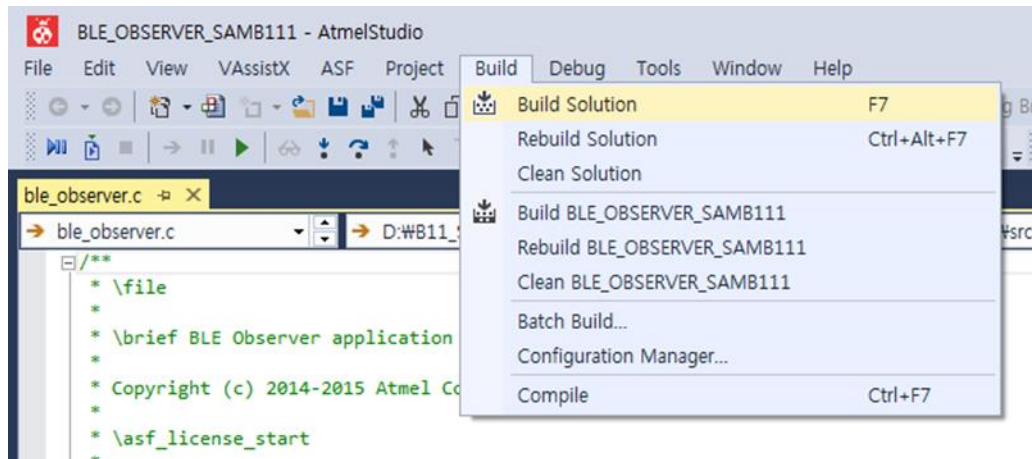

2. Select "SAMB11" in device family, enter "Observer" in search window and expand Atmel Corp Projects. The location and the name of the project can be selected in the respective fields. Click OK.

Figure 4-2. Selecting Observer Application from Example Projects

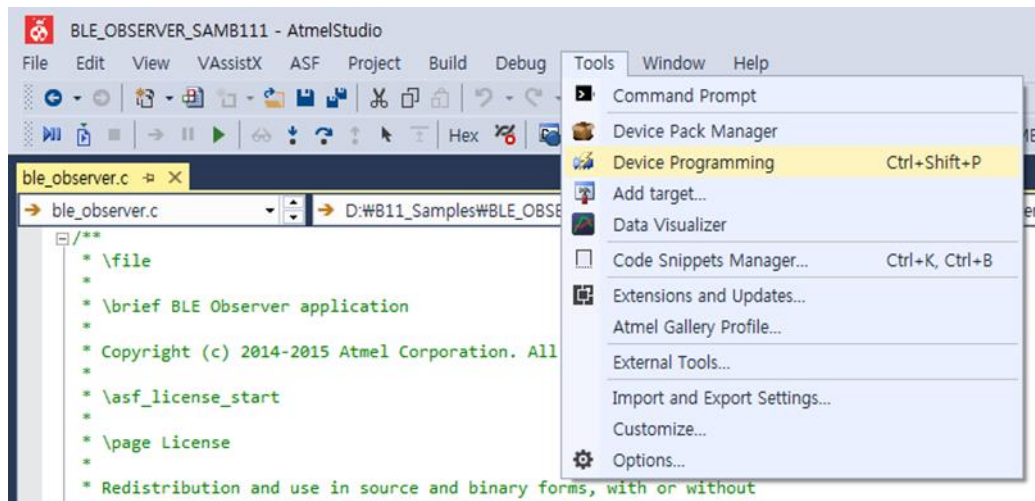

3. Accept the license Agreement. The studio will generate the Observer project for ATSAMB11.
4. Build the solution.

**Figure 4-3. Building Observer Application**

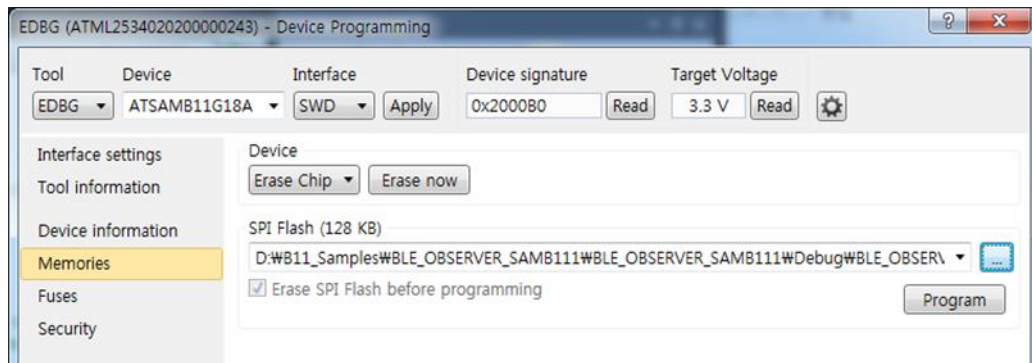

5. Download the application via the USB to the ATSAMB11 board by using the Device Programming option available in Tools as shown below.

**Figure 4-4. Flashing the Application on Atmel MCU**

6. Program the device to download the Observer application as shown below.

**Figure 4-5. Flashing Programming**

## 5 Console Logging

For the purpose of debugging, a logging interface has been implemented in the Observer Application.

The logging interface utilizes the same PC COM port that connects to ATSAMB11. A serial port monitor application (for example TeraTerm) shall be opened and attached to the USB COM port.

## 6 Running the Demo

1. Power on the ATSAMB11 by connecting the USB Cable.
2. Open any Terminal Application (e.g. TeraTerm) Select the COM Port and Baudrate 115200, None Parity, one Stop bit, one Start bit, no Hardware Handshake.
3. Press the Reset button on the ATSAMB11 board.
4. The device is now in scanning mode.

## 7 Configuration Options

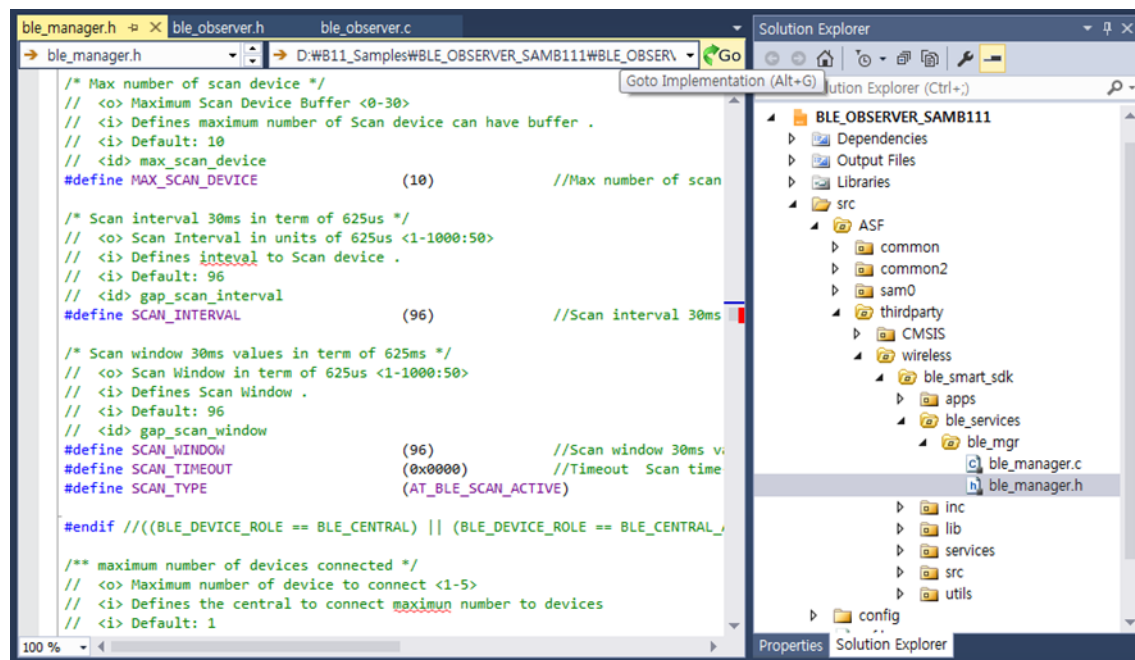

The default scanning parameters of Observer are mentioned below:

MAX_SCAN_DEVICE	(10)
SCAN_INTERVAL	(96)
SCAN_WINDOW	(96)
SCAN_TIMEOUT	(0x0000)
SCAN_TYPE	(AT_BLE_SCAN_ACTIVE)

The above options can be changed by as per the need.

They are available in the ble\_manager.h located in `\\asf\\thirdparty\\wireless\\ble_smart_sdk\\ble_services\\ble_mgr` which is shown in Figure 7-1.

## 9 **ATMEL EVALUATION BOARD/KIT IMPORTANT NOTICE AND DISCLAIMER**

This evaluation board/kit is intended for user's internal development and evaluation purposes only. It is not a finished product and may not comply with technical or legal requirements that are applicable to finished products, including, without limitation, directives or regulations relating to electromagnetic compatibility, recycling (WEEE), FCC, CE or UL. Atmel is providing this evaluation board/kit "AS IS" without any warranties or indemnities. The user assumes all responsibility and liability for handling and use of the evaluation board/kit including, without limitation, the responsibility to take any and all appropriate precautions with regard to electrostatic discharge and other technical issues. User indemnifies Atmel from any claim arising from user's handling or use of this evaluation board/kit. Except for the limited purpose of internal development and evaluation as specified above, no license, express or implied, by estoppel or otherwise, to any Atmel intellectual property right is granted hereunder. ATMEL SHALL NOT BE LIABLE FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES RELATING TO USE OF THIS EVALUATION BOARD/KIT.
